Welcome to Eudora!

Eudora is now licensed in three ways: Sponsored Mode, Paid Mode, and Light Mode. Unless you change modes, Eudora will run in Sponsored Mode, meaning it will display ads.

We have done our best to present the ads in a way that respects the work you do in email. By allowing Eudora to display ads, you get the full power of Eudora for free and we can still pay our bills.

If you decide the ads are not for you, you can change modes. Paid Mode shows no ads. Current Eudora Pro 4.x users will be able to upgrade to Paid Mode for free. Other users will be able to pay a license fee to go to Paid Mode. At this stage in testing, the machinery for Paid Mode is not fully tested, and Paid Mode is unavailable. Light Mode also shows no ads, but has many fewer features.

To switch forms of Eudora, please use the "Payment & Registration" item in the Help menu. To learn more about the three modes, click on the "Tell Me More" button below

Thanks for choosing to register Eudora!

You'll next be walked through a few quick steps, as described below, before registration is complete:

- Eudora will open your web browser and take you to our registration page
- You'll fill in some simple registration information on the web site
- We'll then email a Eudora registration code back to you
- The next time you check mail, Eudora will automatically recognize this code and display a dialog box inviting you to confirm your registration information
- Ta da! You'll then become a registered user of Eudora... Thanks!

Do you really want to switch to the Light version of Eudora?

While Eudora in light mode remains a very capable email client, it lacks the power of the full version. Here are some of the features you would be giving up, with checkmarks next to the ones you're using now:

- ✓ Check the spelling of your email messages as you type
- ✓ Multiple personalities for managing multiple mail accounts or identities
- Message stationery to help you respond to your mail more quickly
- Multiple signatures to help personalize your mail
- ✓ More powerful filtering
 - Change the personality associated with messages for better organization
 - ✓ Play various sounds when mail arrives depending on your filters
 - Open a message or mailbox in response to a filter
 - Print mail directly from filters

You can continue to enjoy the time-saving power of these features, at no charge, simply by leaving Eudora in sponsored mode. If you really want to make the ads go away but keep Eudora's full capabilities, hit "Cancel" and then select "Full Version (costs money, no ads)." ¹²

Fig. 15H

Persistent Ads	
PlayList Request	faceTime Used to determine how much advertising to send to client faceTimeLeft Not used
PlayList Response ClientInfo	reqInterval Relatively large: one or more days flush Used Single playlist completely specifies list of ads client should have
PlayList Response Scheduling Parameters	showFormMax Not used

Fig. 16A

Short-Lived Ads	
PlayList Request	faceTime Not used faceTimeLeft Used to determine how many ads client should receive
PlayList Response ClientInfo	reqInterval Not used Instead, client requests new playlist whenever ads "run low" flush Not used
PlayList Response Scheduling Parameters	showFormMax Used to determine how long an ad runs

Fig. 16B

Eudora doesn't seem to be getting ads.

For some reason, Eudora is unable to download new ads. Downloading and displaying ads is a requirement for the free full-featured version of Eudora. Please visit the Eudora web site for information about how to resume getting ads.

Invalid HTTP request (Error code: 503)

If ad downloading continues to fail, Eudora will eventually revert to the Light version which is less powerful.

Take me to the Eudora web site

Fig. 17A

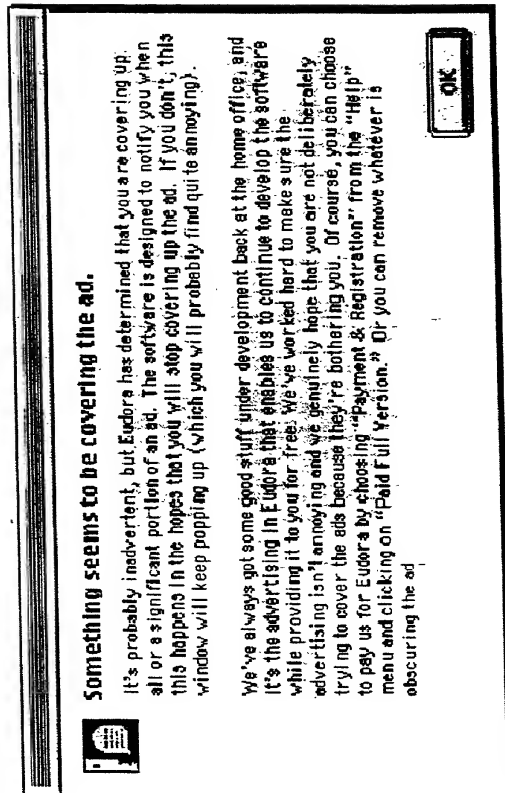

Fig. 17B

Eudora will now revert to a less powerful version.

Eudora has been unable to download ads for quite some time and will now revert to a less powerful version. If you would like more information about why Eudora's features are being reduced at this time, please visit the Eudora web site. You will find information there about how the full-featured version can be reactivated.

We're sorry for this inconvenience.

Take me to the Eudora web site.

Sadly, OK.

Fig. 17C

We'd like to know how you use Eudora.

In order to make Eudora work as well as possible, it's important that we know how people use it. We ask users for this information at random. Looks like it's your turn. If you're open to helping us this way, all you have to do is click "Generate Info" below and a message will be created. You can review the contents of the message if you like, and then send it to us or not -- that's up to you.

We value our privacy; we're pretty sure you value yours. So we want you to know what we'll be collecting and give you a chance to eliminate anything you don't want to send. Simply uncheck the boxes next to any information you'd rather not send.

Please understand that as soon as we resolve your email, we will throw away the headers that identify the mail as coming from you. You see, we don't actually need to know who you are to find your information helpful. So we promise to protect your privacy and turn you into "just a number."

It's OK to transmit statistics regarding:

- ☒ Your demographic data
- ☒ Your Net/Eudora usage
- ☒ Advertisement information
- ☒ Eudora features you use
- ☒ Non-personal settings

⌘ The list of available ads advantageously can be built from the following query:

```
ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today + 30 AND AdType = 'I' AND AdStatus = 'A' AND ImpressionsServed < Impressions ORDER BY ImpressionsServed ASC);
```

run out ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today + 30 AND AdType = 'R' AND AdStatus = 'A' AND ImpressionsServed < Impressions ORDER BY ImpressionsServed ASC);

⌘ The time required to deliver the ads advantageously can be calculated in the following manner.

```
face time left for today [seconds] = faceTime(today) - faceTimeUsedToday
```

(Comment: Face time left for today is the number of seconds the servlet can use to deliver special ads today.)

```
predict face time [seconds] = SUM( faceTime[tomorrow + 1], ... faceTime[tomorrow + reqInterval]
```

(Comment: Predict face time is the number of seconds the servlet predicts the user is going to have.)

```
goal show time left [seconds] = predict face time - faceTimeLeft
```

(Comment: Goal show time left is the number of seconds that the software provider needs to fill with ads.)

Fig. 21A

```

8 Targeting
  while (face time left for today ) {
    if ad is not in the history {
      select ad [according to target = today]
      face time left for today -= ad.showFor
    }
    next ad
  }

  while ((Goal show time left ) {
    if ad is not in the history {
      select ad [according to target]
      goal show time left -= ad.showFor
    }
    next ad
  }

```

Default values:
 reqInterval = 1 day.
 faceTime = 30 minutes
 faceTimeQuota is ?
 histLength = 31 days
